Luis Carbuccia

Senior Software Developer

PROFILE

Java developer extraordinaire with a knack for crafting scalable, maintainable, and high-quality code. Looking to master Java, Spring, Hibernate, and SQL, and always on the lookout for the next challenge to conquer. Passionate about learning new technologies and finding creative solutions to complex problems (and cracking the occasional programming joke).

EXPERIENCE

Senior Software Engineer Discover Financial

05/2022 / Remote(Chicago,Illinois)

- Collaborated with cross-functional teams to conjure the successful integration of new features and technologies into existing applications.
- Rewrote front end UI with REACT.js, to better conform to technologies being used today
- Served as a magical mentor to junior developers, teaching them the ways of Java development and unlocking their full potential.
- Conjured up RESTful APIs using Spring Boot, Hibernate, and MySQL, resulting in lightning fast response times.

Sr. Software Engineer NetJets

Oct2021-May2022 / Columbus,OH

- Maintained and supported 60+ projects and resolved open defect tickets.
- Teamed up with current clients to understand needs for improved functionality, and communicated with engineers and clients to develop enhancements that boosted client satisfaction
- Diagnosed error tickets for Java Microservices and .Net applications.

Software Engineer JPMorgan Chase

Mar2017-Oct2021 / Columbus,OH

- Part of a rebel squad of 3 other developers who worked under the supervision of a senior software engineer to bring to life a fresh, greenfield app with a VUE.js front end and a SpringBoot back end.
- Received more coaching and support than a child actor on a movie set, gaining practical experience in Java with Spring Boot and React.js
- Studied data structures to recommend changes in algorithms, which made the code simpler than a 5-year-old's coloring book

3302 Oheagra Dr   614-397-6302

lcarbuccia@gmail.com

- Worked on Android tablet application from branches using MVVM pattern. RESTful API (JAVA backend) for webapp (Angular, VUE.js) and Android apps.
- Worked on internal app. a champion of TDD (JUnit/Jasmine testing) like a gladiator in the arena, pushing your team to maintain at least 70% coverage.
- Used a Spring Webflow framework with open source tools (Eclipse Neon IDE, Tomcat, Apache Maven), RactiveJS, and proprietary frameworks.
- Started buildout of Microservices which are now replacing monolith legacy apps built on older tech stack.

Web Developer (IT consultant) Nationwide
May2015-March2017 / Columbus,OH

- Practiced test driven development on various customer-facing applications. Worked on JS front-ends with mostly IBM tooled backends (WebSphere, RAD, etc.) in the Java EE stack.
- Contributed to digitizing proof of insurance while using Angular.js
- Practiced and participated in all Agile scrum ceremonies.

SKILLS
- Java (of course)
- Spring Framework
- SQL
- RESTful APIs (aka the glue that holds everything together)
- Agile development methodologies (because life is too short to be stuck in Waterfall)
- Git (not to be confused with Jedi mind tricks)
- IntelliJ IDEA (my trusty lightsaber)
- JUnit (for testing the limits of the Force)
- Maven (what makes everything work)
